

Science – It's My World

(Animals including Humans and Seasonal Change)

What I already know

I have explored the natural world around me, including the changing seasons. I have made observations of animals.

What I will learn (Sticky Knowledge)

- The names of basic parts of the human body
- Which sense is associated with which part of the body
- The differences between Autumn and Winter including differences in the weather and day length.
- The names of some animals (nocturnal)
- The different structures animals have

We will also

- Explore the world using our senses
- Predict and investigate
- Gather and record data to answer questions.
- Make observations
- Sort and Classify

Key Vocabulary

Human

Parts of the Body

Sight, Touch, Hearing, Taste, Smell

Autumn

Winter

Change

Nocturnal

Hedgehog, badger, owl, toad, bat etc

Claw, talon, nose, snout, feathers, bones, spikes
