

# Art – Street Art

## Topic Overview

In this topic, we will look at different types of street art. Street art is a form of art displayed in public spaces, often on buildings, streets, and other surfaces. It's characterized by its accessibility and democratic nature, aiming to be seen by a broad audience outside of traditional gallery settings. While related to graffiti, street art often involves a wider range of materials and techniques, including spray paint, stencils, stickers, and even projecting videos. We will create our own tag.
